Sustainability Strategy & ESG Integration, Sustainability Reporting & Performance Monitoring, Compliance & Certification Management, HSE Systems & Risk Management, Stakeholder Engagement & Collaboration, Environmental & Social Impact Initiatives, Project Coordination & Continuous Improvement, Data-driven insights & KPI development,

Professional Experience

ESG & Sustainability Consultant

2025 - Present

The Aggregate co

- Supported clients to develop and implement ESG and sustainability frameworks across logistics and operational environments, coordinating cross-functional stakeholders to align processes and reporting.
- Developed sustainability KPIs and reporting frameworks, and built Microsoft Excel and Power BI performance-monitoring templates to track metrics against organisational objectives.
- Conducted materiality assessments and stakeholder engagement to identify sustainability priorities and surface improvement opportunities for clients.
- Assisted in drafting environmental, sustainability and modern slavery policies to meet client and industry compliance requirements.
- Prepared sustainability responses for customer requirements and tender submissions, supporting procurement and contract documentation.
- Supported implementation of sustainability reporting systems and continuous improvement initiatives, including data governance and performance tracking.
- Demonstrated ability to work independently on complex data analysis projects, delivering actionable insights for the business intelligence team.
- Analyzed greenhouse trends and performance metrics to identify areas for improvement and optimize business operations
- Applied knowledge of regulatory compliance to enhance the accuracy and integrity of business intelligence data.
- Conducted ad hoc analysis to address critical business questions, delivering timely and accurate information to stakeholders

- Applied cost management principles to analyze business data and identify areas for improvement

Sustainability Coordinator (Infrastructure & Major Projects)

2023 - 2025

CPB Contractors

- Coordinated sustainability activities across major infrastructure projects (including Western Sydney Airport and Sydney Metro), liaising with project teams and subcontractors to integrate sustainability requirements into construction workflows.
- Managed Infrastructure Sustainability (ISC) certification requirements, preparing compliance documentation and compiling performance data for certification and audit purposes.
- Coordinated collection, analysis and reporting of sustainability performance data using Microsoft Excel and Power BI dashboards to monitor KPIs and support decision-making.
- Engaged clients, contractors and suppliers to implement materials management and waste reduction initiatives and track outcomes.
- Supported implementation of sustainability initiatives—materials management, waste reduction and environmental performance improvements—by providing data-driven insights and operational recommendations.
- Conducted audits, inspections and compliance reviews to validate sustainability data and ensure reporting accuracy for project certification.
- Prepared sustainability reports, stakeholder communications and project documentation including KPI summaries and trend analysis.
- Utilized strong analytical abilities to develop comprehensive reports and dashboards for stakeholders
- Applied effective written and verbal communication to collaborate with technical and non-technical teams on BI projects
- Managed vendor contracts and service level agreements for Sustainability requirements.
- Developed and maintained data analytics dashboards to monitor business performance and identify areas for improvement
- prepared and sent out invoices to clients as well as archived invoices in a separate drive

Sustainability coordinator

2022 - 2023

John Holland

- Supported sustainability coordination across Sydney Football Stadium and Sydney Children's Hospital projects, working with project teams to meet certification targets.
- Assisted project teams to achieve Green Star and other sustainability certifications through data capture and compliance tracking.
- Maintained sustainability reporting systems and performance-tracking processes (Excel-based), ensuring data consistency for audits and reporting.
- Coordinated initiatives across contractors and consultants to implement sustainability measures and monitor delivery.
- Supported environmental compliance activities and prepared submissions to meet reporting obligations.
- Prepared reports, audits and project documentation to support certification and project objectives.
- Ensured data reliability and accuracy for critical business intelligence reporting and analysis

Consultant (Sustainability & Advisory)

Jan 2022 - Jun 2022

RSM

- Conducted sustainability research and data analysis to inform client advisory work and recommendations.

- Assisted with sustainability assessments and reporting, preparing analysis and presentation materials for stakeholders.
- Supported development of client recommendations on sustainability performance and risk management based on data analysis.
- Prepared reports, presentations and supporting documentation; developed visual summaries to communicate findings to clients.
- Collaborated across project teams to deliver consulting engagements and support client implementation.
